

Bob Tabrizi

San Diego, CA | (408) 666-1649 | bobak.tabrizi@gmail.com

SUMMARY

Senior Software Engineer with 5 years of experience building React and TypeScript web applications backed by Java Spring services. Experienced leading engineering teams, designing REST APIs, modernizing frontend tooling (Webpack to Vite, Jest to Vitest), and building test infrastructure with React Testing Library, Mock Service Worker, and Selenium. Hands-on experience with AWS (EC2, S3, DynamoDB) and Docker.

SKILLS

Languages: JavaScript, TypeScript, Java, HTML, CSS, SQL, C++

Frontend: React, Next.js, Redux, React Native, Responsive Design

Backend: Java Spring, REST APIs, Node.js, Express, PostgreSQL, MongoDB

Testing: Vitest, Jest, React Testing Library, Mock Service Worker (MSW), Selenium, Robot Framework

Cloud & DevOps: AWS (EC2, S3, DynamoDB), Docker, CI/CD (Jenkins, GitHub Actions)

Tools & Practices: Vite, Webpack, Git, Agile/Scrum

WORK EXPERIENCE

Booz Allen Hamilton

July 2025 – Present

Senior Software Engineer

San Diego, CA

- Migrated the frontend build system from Webpack 4 to Vite, reducing build times by approximately 30%
- Built support tooling using Docker and AWS services, including EC2, S3, and DynamoDB
- Migrated the unit test suite from Jest to Vitest, aligning test tooling with the new Vite build pipeline
- Built an automated end-to-end test suite using Robot Framework and SeleniumLibrary that runs across multiple VMs, enabling repeatable regression testing across environments
- Develop features for a React and TypeScript application with a Java backend as part of a 9-engineer Agile team
- Serve as Scrum Master for the engineering team, facilitating sprint planning, daily stand-ups, sprint reviews, and retrospectives

G2 Software Systems

Sept. 2021 – June 2025

Full Stack Software Engineer

San Diego, CA

- Led a team of 3–5 software engineers delivering features and bug fixes across a React frontend and Java Spring backend
- Designed and built Java Spring REST endpoints powering in-depth, customizable data management features
- Led a full UI redesign of the React application, from wireframes and prototypes through implementation, in close collaboration with the client
- Rebuilt the UI unit test suite with React Testing Library, delivering more effective and comprehensive test coverage
- Architected an API mocking layer using Mock Service Worker (MSW), enabling end-to-end testing of UI workflows against realistic API responses
- Mentored new hires and fellow developers; led knowledge-sharing sessions and wrote design documentation for new frontend and backend systems

UC San Diego Information Technology Services

Sept. 2019 – Dec. 2020

ITS Lead Technician

San Diego, CA

- Built internal web applications for the IT department using PHP and JavaScript
- Coordinated across campus IT departments to resolve complex networking and technical issues
- Collaborated with a team of student technicians to improve the efficiency and accuracy of IT services

EDUCATION

University of California San Diego

2021

B.S., Computer Science & Mathematics
